

MACHINE TO CUT CORNERS

Motor driven machine to cut corners (45°) onto coating materials (paper, plasticized paper, cloth, balacron, board, etc.) and to round board, presspan and similar corners.

Technical features

Greatest reliability and accuracy thanks to motor driving.

- cut slide stroke 60mm
- height adjustable work platform (560mm x 1000mm), with square for precise material positioning
- start cycle by pedal or double safety button

Equipped with: nr. 01 cutting tool for 45°

Overall dimensions:
L= 950mm - W=1000mm
