

FULLY AUTOMATIC MACHINES FOR THE ASSEMBLING OF EXPANDING FILE BELLOW

The EFM-250 is a fully automatic line designed to assemble expanding file folders (bellows).

Tab dividers are automatically counted and composed in groups of 12, then joined to the side sheets by a hot welding unit. Each bellow is extracted, compacted, rotated 90° and delivered ready for pick-up.

Technical features

Mechanical speed:
250 pcs./hour

Operator needed to run the line: 1
